this collection of essays explores the significance of modern chaos theory as a new
paradigm in literary studies and argues for the usefulness of borrowings from one
discipline to another its thesis is that external reality is real and is not merely a
social construct on the other hand this volume reflects the belief that literature as a
social and cultural construct is not unrelated to that external reality the authors
represented here furthermore believe that learning to communicate across
disciplinary divides is worth the risk of looking silly to purists and dogmatists in
applying a contemporary scientific grid to a by gone era the authors play out steven
weinberg s exhortation to mind the clues to the past that cannot be obtained in any
other way it is of course necessary to get the science right yet the essays in this
collection do not seek to do science but rather to suggest that science and literature
often share common assumptions and realities thus there is no attempt to legitimize
literary study through the adoption of a scientific approach interaction between the
disciplines requires mutual respect and a willingness to investigate the broader
implications of scientific research consequently this volume will be of interest to

students and scholars of the long eighteenth century whether the focus is on england locke milton radcliffe lewis france cr billion diderot marivaux montesquieu or germany kant moritz goethe fr schlegel moreover given its multiple thrust in employing mythological philosophical and scientific notions of chaos this volume will appeal to historians and philosophers of the european enlightenment as well as to literary historians the volume ultimately aspires to promote communication across centuries and across disciplines

this collection of essays is devoted to the diversity of the conceptual and terminological definitions of the notion of the absolute absolute comprises both the concepts of the western world related to god and the verbal constructions flowing from these ideas in the spheres of law philosophy linguistics politics medicine literature and arts over time absolute and its neologisms have undergone various modifications assuming the associated characteristics of syntactic ambiguity and inflation absolute can imply an increase in the degree of a quality attached to some object or phenomenon and can be used as either an adverbial modifier or a proper noun in its appearances as a procedural term absolute mostly conveys a negative connotation when evaluating some action the question posed in this book is not what absolute is but what possibilities exist with regard to perceiving and conceptualizing it in human terms both historically and in the present

in the history of humanity as well as in the brief and recent history of the new paradigms in science we find theories of the way the heavens and the earth are or should be in this book our intention is to examine in depth those that build bridges humanity and consciousness are positioned as the foundation of the human being in the face of those who would reduce him to a genetic robot based on many years of work in the field we are offering a possible doorway to healing as a bridge of knowledge in day to day life so that my masters my patients can receive what they have taught me the magic of transforming an obstacle into a lever this book is therefore both theoretical and practical in order to assist in resolving those painful repetitions of our ancestors lives blind programming and painful wounds with a view to finding a healing path nature s and therefore evolution s secret in which the psychology of complexity serves to reconcile us with life in our afflicted and opportune world

this volume is a collection of papers presented during methodological workshops organized by codesria its objective is to revitalize theory and methodology in field work in africa while contributing to the creation of a critical space hinged upon the mastery of epistemological bases which are indispensable to any scientific imagination

the origins of selected instances of metamorphosis in germanic literature are traced from their roots in ovid s metamorphoses grouped roughly on an ascending evolutionary scale invertebrates birds animals and mermaids whilst a broad range of mythological legendary fairytale and folktale traditions have played an appreciable part ovid s metamorphoses is still an important comparative analysis and reference point for nineteenth and twentieth century german language narratives of transformations metamorphosis is most often used as an index of crisis an existential crisis of the subject or a crisis in a society s moral social or cultural values specifically selected texts for analysis include jeremias gotthelf s die schwarze spinne 1842 with the terrifying metamorphoses of christine into a black spider the metamorphosis of gregor samsa in kafka s die verwandlung 1915 ambiguous metamorphoses in e t a hoffmann s der goldne topf 1814 hermann hesse s piktors
